

Enhanced Podcasts

- Open Garageband
- Choose New Podcast Episode
- Save
- Select the Male or Female Track
- Record by clicking the red button

Select the Jingles Track

- Click on the eye to view selections
- Drag and drop your selection into the track
- Drag and drop sound effects to automatically add a new track
- Slide voice, jingles and sound effects to create your audio.

Add Artwork

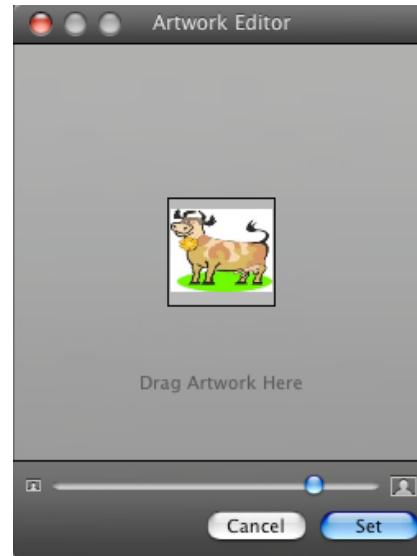

- Click on the Podcast Track
- Drag Artwork into Episode Artwork
- Add other art to the Podcast Track and adjust as needed to enhance the Podcast.

Enhanced Podcasts

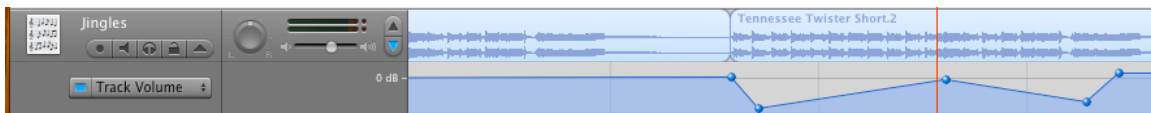

Adjust the size of your Artwork

- Double click the picture to open the Artwork Editor – use the slider and adjust the box to fit your art.

Adjust the track volume

- Click on the right triangle under the track title
- This opens the Track volume area
- Click on the line – a break (dot) is created
- Adjust the volume by adding more breaks (dots) and adjusting the volume level as desired.

Ducking

- Click on the top triangle as shown to adjust volume levels so that the Voice track is the focal track.
